Surya Kommuguri

Tempe, AZ | 480-555-0100 | s@example.com | linkedin.com/in/surya

SUMMARY

Software engineer with production experience across AI/ML, distributed systems, cloud infrastructure, and full-stack applications for regulated healthcare environments.

EXPERIENCE

HealthTech Co 0, Remote **January 2020 - December 2021**

Software Engineer II 0 · Full-time

- Designed and shipped production FastAPI services on AWS EKS with PostgreSQL, Redis, Kafka, OpenTelemetry, Datadog, and CI/CD via GitHub Actions for multi-tenant healthcare workloads under HIPAA.
- Built RAG retrieval pipelines with vector embeddings, LangChain, Bedrock, and pgvector; evaluated quality on a labeled 100-question set for groundedness and citation accuracy across clinical notes.
- Owned React and TypeScript frontends with Redux, REST APIs, and Spring Boot backends; improved query latency with MySQL indexes and MongoDB aggregations while mentoring three junior engineers.
- Automated infrastructure with Terraform, Helm, Docker, Kubernetes, Prometheus, Grafana, and ELK; reduced incident MTTR through runbooks and on-call ownership of microservices platforms.

HealthTech Co 1, Remote **January 2021 - December 2022**

Software Engineer II 1 · Full-time

- Designed and shipped production FastAPI services on AWS EKS with PostgreSQL, Redis, Kafka, OpenTelemetry, Datadog, and CI/CD via GitHub Actions for multi-tenant healthcare workloads under HIPAA.
- Built RAG retrieval pipelines with vector embeddings, LangChain, Bedrock, and pgvector; evaluated quality on a labeled 100-question set for groundedness and citation accuracy across clinical notes.
- Owned React and TypeScript frontends with Redux, REST APIs, and Spring Boot backends; improved query latency with MySQL indexes and MongoDB aggregations while mentoring three junior engineers.
- Automated infrastructure with Terraform, Helm, Docker, Kubernetes, Prometheus, Grafana, and ELK; reduced incident MTTR through runbooks and on-call ownership of microservices platforms.

HealthTech Co 2, Remote **January 2022 - December 2023**

Software Engineer II 2 · Full-time

- Designed and shipped production FastAPI services on AWS EKS with PostgreSQL, Redis, Kafka, OpenTelemetry, Datadog, and CI/CD via GitHub Actions for multi-tenant healthcare workloads under HIPAA.
- Built RAG retrieval pipelines with vector embeddings, LangChain, Bedrock, and pgvector; evaluated quality on a labeled 100-question set for groundedness and citation accuracy across clinical notes.
- Owned React and TypeScript frontends with Redux, REST APIs, and Spring Boot backends; improved query latency with MySQL indexes and MongoDB aggregations while mentoring three junior engineers.
- Automated infrastructure with Terraform, Helm, Docker, Kubernetes, Prometheus, Grafana, and ELK; reduced incident MTTR through runbooks and on-call ownership of microservices platforms.

Startup Labs, Tempe, AZ **June 2019 - December 2020**

Software Engineer · Full-time

- Designed and shipped production FastAPI services on AWS EKS with PostgreSQL, Redis, Kafka, OpenTelemetry, Datadog, and CI/CD via GitHub Actions for multi-tenant healthcare workloads under HIPAA.
- Built RAG retrieval pipelines with vector embeddings, LangChain, Bedrock, and pgvector; evaluated quality on a labeled 100-question set for groundedness and citation accuracy across clinical notes.
- Owned React and TypeScript frontends with Redux, REST APIs, and Spring Boot backends; improved query latency with MySQL indexes and MongoDB aggregations while mentoring three junior engineers.

TECHNICAL SKILLS

AI & ML: RAG pipelines, vector embeddings, LLM API integration, prompt engineering, LangChain
Cloud: AWS (Bedrock, EKS, EC2, S3)
Distributed Systems & Data: PostgreSQL, pgvector, MySQL, MongoDB, query optimization, Apache Kafka, RabbitMQ, Redis
Frameworks: React, REST APIs, FastAPI, Django, Spring Boot, Spring Data JPA, Node.js, Redux, Angular
Infrastructure: Docker, Kubernetes, Terraform, Helm, GitHub Actions
Languages: Python, Java, TypeScript, JavaScript, SQL
Observability & Testing: Unit Testing, Integration Testing, OpenTelemetry, Datadog, Prometheus, Grafana, ELK Stack, pytest, JUnit, Mockito
Standards: Code Review, Agile, microservices, async programming, FHIR R4, HIPAA

EDUCATION

Arizona State University | Tempe, AZ **January 2024 - December 2025**

Master of Science, Information Technology
